

HomeBase Hard Drive Installation

1. Power off HomeBase before installing the drive.
2. Remove top lid. Push down and remove the lid.
3. Remove the screw on the top holding down the drive tray. Pull up the tray to remove.
4. Place the hard drive in the tray and use the 4 screws that came with the HomeBase to screw in the sides of the tray.
5. Insert back the assembled tray into the HomeBase unit.
6. Replace the screw holding down the tray. Replace the top lid.
7. Use the HomeBase app to connect to the hard drive under **HomeBase->Storage Management->Storage->HD**. You will need to format the drive before the video recordings will be stored on the drive.
